PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of experience building scalable web applications using React.js, TypeScript, Node.js, Express.js and MySQL. Skilled in developing RESTful APIs, reusable frontend components, role-based access workflows, database-driven modules, analytics dashboards and e-commerce features. Strong experience in API integration, state management, performance optimization.

CORE SKILLS

- **Frontend:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, RESTful APIs, API validation, error handling, authentication
- **Database:** MySQL, Sequelize ORM, relational schema design, CRUD operations
- **State & Data:** Redux, TanStack Query (React Query), Axios
- **Data Visualization:** AG Grid, Highcharts
- **Tools & Testing:** Git, GitHub, Vite, Jest, Postman, VS Code, AI-assisted development tools

PROFESSIONAL EXPERIENCE

Software Engineer | Apr 2024 – Present

Invendis Technologies India Pvt Ltd – Bengaluru

- Developed React.js and TypeScript-based enterprise web applications for telecom, energy monitoring and configuration management domains.
- Built real-time analytics dashboards using AG Grid and Highcharts with API-driven data.
- Reduced bundle size from 20MB to 6MB, improving load time by ~50%.
- Integrated REST APIs, implemented RBAC flows.

KEY PROJECTS

PawsZone.in – Full Stack Pet Commerce Platform | React.js, Node.js, Express.js, MySQL

- Designed and developed a full-stack pet-commerce web application from scratch using React.js, Node.js, Express.js and MySQL.
- Implemented end-to-end e-commerce workflows including product browsing, cart, checkout, order placement, order management and delivery-related functionality.
- Created RESTful APIs with Express.js for products, categories, users, carts, orders and admin operations, including request validation, structured error handling and route-level business logic.
- Designed MySQL tables and Sequelize models for relational data handling, CRUD operations, order records and product catalog management.
- Developed responsive, reusable React components and integrated Cloudinary for product image management and used Razor Pay payment gateway for payments.

Enterprise Role & Configuration Platform – React.js, TypeScript

- Developed a role-based configuration platform to manage sites, devices, users and roles across applications.
- Built dynamic forms, API integrations and reusable UI components for centralized configuration.

Enterprise Telecom Monitoring Dashboard – React.js, AG Grid, Highcharts

- Developed a real-time analytics dashboard to monitor and analyse equipment faults, helping reduce unnecessary operational costs.
- Optimized large datasets using server-side pagination and virtualization in AG Grid.
- Project details are summarized without exposing internal URLs, client-sensitive information or proprietary implementation details.

EDUCATION

B.E – Electronics & Communication Engineering | KS Institute of Technology (KSIT) | 2022
